HONGKONG, MAY 19TH, 1890.

Some official statement with reference to the Money Order defalcations has been looked for with considerable interest. The Hon. P. RYELS gave notice at the last meeting Legislative Council of his intention to ask a question on the subject at the next meeting and His Excellency at once stated that defalcations had taken place, but he was at the time unable to give particulars. The case is undoubtedly a bad one, and its gravity, as affecting the Audit Office, but we do not know how much truth there is is aggravated if it be true, as alleged, that the statement, that the steamer Celestial attention was called to the unsatisfactory state of the accounts some years ago. At present, however, it does not lie with the last. The Celestial cleared for Batavia on Tuescommercial community to scoff too much at the ways of officialdom. Two wrongs do not make a right, nor yet three, but with a couple of big bank frauds fresh in our recollection and the fact that one of our most important public companies finds its accounts in such a condition of disorder that t is unable to lay a statement before the shareholders, the non-official section of the stock. community may not unnaturally feel someexistence of very reprehensible carelessness both in Government departments and mercantile establishments. Defalcations by a Government servant, however, de strike one as a matter of somewhat greater gravity than similar defalcations outside. The de partments are free from the stress of commercial life, no one connected with them is ever expected to be in a hurry and there is supposed to be a beautiful system of audit by which the smallest error of account must be brought to light, even though it require the expenditure of reams of foolscap and miles of red tape, That a Government servant should steal he has the opportunity is no more surprising than that any one else should do the same thing, but it is a rude shock to find that all the elaborate arrangements to render such a thing impossible are useless and that a man can go on committing a series of peculations extending over a number of years without ever being found out

ther it will be granted or not is a matter of some doubt, but in any case a very scarching investigation is required into the question why his peculations were not discovered before they had reached anything like the amount they did. A man with a salary of \$120 a month is not supposed to be entrusted with the custody of large sums for lengthened periods. The case as it affects BARRADAS personally is a matter of much less public importance than the lamentable to have rendered the commission of the crime impossible.

WE trust that the whole of the numerous companies which have been formed in board when pulling the bow car of the sampan,

The Ceylon Observer relates the following ampleasant experience of a burglar :- Burglaries are of almost nightly occurrence. One fellow the night before last was properly dealt with by company showed decided improvement. In the 1890, I found that the buildings had been delayed by a Moorman in Kollupittiya, The thicf had made a hole in the wall sufficient to introduce his hand. The Moorman quietly waited beside till the hand appeared inside, then down came a sharp chopper on it, severing all four flugers, which were left behind as a memento. The police have not been able to trace the burglar yet. He evidently bandaged up his fingers to prevent any trace of blood beyond a few yards.

The trade returns for the Philippine Islands for last year show large total increases over those for 1888. The figures for imports and exports stand respectively at 232 and 141 million dollars, the difference to the advantage of 18-9 under these heads being 21 and 64 million. The results (says a Manila paper) gainesy the forecasts of pessimists, who have of late never wearled holding that the trade of the islands would keep on the downward path. The fact that the im-

THE WORLD'S STORE OF COAL Geographical examinations carried on in recent years have had the effect of showing that coal, like petroleum, is one of the most widely distributod substances in nature, and that workable o alfields exist in nearly every country on the fine of the earth, while in some places the mineral is heaped up to quantities that appear incredibly ge. For instance, the comparatively small isud of Formosa contains within its limited area no less than 10,000 square miles of coal d. posits. and the coal veius there reach the enormous thickness in parts of 9.ft. When it is rememered that 9ft and 10ft is considered a good thick vein, the value of the Formosa supplies will be China Horneo more readily understood. The deposits of the China Sugar hinese island alone would suffice to keep the Chinese Loan 84 world for centuries, and yet only a few years ago | Chinese Loan '84 the fact that the mineral existed there was quite | Chinese Losu 86 unknown to Europeans. Leaving out of con. Cruickshank & Co. sideration Eugland, Europe possesses an Dairy Farm Co. area of coal deposits far larger than is gener. Darvel Bay Trading. and Holland, Switzerland, Denmark, Germany, and Bohemia, possess a coal area available of H. Brick & Cement. nearly 60,000 square miles. Then Austria. Spain, Peringal, Italy, and Grees contain coal Hongkong & C. Gas. deposits estimated to cover an extent of between Hongkong Electric... 30,000 and 40,000 square miles. It must not be H. H. L. Dock in Siberia; in the basin of the Doneta; the Ural region and in the Caucasas. Only a month or two ago the discovery of a rich deposit of arthracite ocal in the Ekaterinoslaw Government was unnounced. Coming to Asia, there are rich stores of coals, in the northern half of Asia Minor. The extent of the Turkish coal deposits can only be guessed at, for a geological survey of even the rudest kind has never yet been attempted in this part of the Sultan's dominions. But the area within which the mineral occurs must be very large, judging from the nature and lay of the country. The neighbouring State, Persia, is belived to possess sone 9,000 square miles of coalfields. Afghanistan is known to contain coal, and in Turkestan and Central Asia the Russian Government has been officially notified of the dis covery of coal deposits. India possesses deposite extending over an area of no less than \$5,000 square miles, and there is little doubt that similar seems of the mineral will be traced in Burmah. Going further east there are some very important coalfields in Japan. Already over 6,000 square miles of deposits have Miningdiscovered, and the soums are being actively worked. Surpassing in extent and v lue all other deposits in Asia are the coalfields of the Chinese Empire. They are estimated to cover upwards of 400,000 square miles, an area greater than that of all the remaining coal deposits of the Old World taken to-gether. The vast store of fuel beaped up in these seams has not even been touched as yet. With this alone to draw upon, the world would for ages have little reason to fear a coal famine, and when the other nuworked areas of Europe and Asia are added to the 400,000 square miles available in the Dragon Empire, it is abundantly clear that the period within which the supplies of the Old World will be exhausted must be very remote indeed. The extent of the United States coalfields is tolerably well known; but they are far from being the richest and most valuable in the New World. It is not at all unlikely that deposits of the Canadian Dominion | Watson & Co., A. S. will prove quite a extensive and important at those of the Republic. British Columbia is one mass of coal, and Nova Scotia is developing its collieries. at a rate that hids fair to muke it the great coal the veins run from 17ft. to 2 ft. in thickness. The state of Columbia, the whole of Pata- Bonares (New) 84821 gonia, and the Republic of Pern have anormous stores of the mineral which have never yet been drawn upon to the extent of a single endowed. But the most extraordinary deposits in the whole world are undoubtedly. They come as a boon and a blessing to men those of Chili, the "nitrate land." Nothing like them is known to exist for the whole Sold by all storekeepers. Beware of imitations. of the southern half of Chili is simply one Machiven & Cameron, Edinburgh, Scotland, vast single deposit of coal. The country, in fact, is raised upon a foundation of coal. But even should the stores of the New World be exhausted in process of time, there will still be a reserve to fall back upon in Australia, New Zealand, Tasmania, New Calendonia, and Natal.
